Simple and Flexible Integration

Velocity's gateway payment solutions are designed to make it simple for you to integrate your front and back end systems into a state-of-the-art payment processing system. Velocity offers both single transaction and batch processing options, giving you the flexibility to select the option that best meets your needs. Velocity will respond in real time with the results of each transaction, allowing you to quickly update your systems.

Comprehensive Payment Solution

In addition to the gateway payment interface, every Velocity solution includes real time, online reporting to support your cash management and reconciliation activities, as well as full transaction search capability, a critical tool for your customer support organization. Velocity's virtual terminal product is also standard with all Velocity gateway deployments. The full featured virtual terminal gives your personnel the ability to perform all of the payment processing actions that are available with the Velocity gateway, providing you with the ultimate flexibility to process transactions through multiple channels.

Security and Compliance

Velocity's gateway solutions are fully compliant with the best practices of PCI, SAS-70 Type II and HIPAA. Velocity also takes data security very seriously, ensuring that all payment transactions are fully encrypted and processed in a secure manner. With Velocity's gateway, we manage payment processing so you can focus on your business.
