Velocity for Hospitals reduces billing and transaction costs.

Velocity expands payment options for patients. Improved revenue collection and payment processing reduces uncompensated care, lowers operating costs, and streamlines reconciliation. This improvement in cash flow lowers account receivable days and reduces bad debt.

Offering 24-hour self-service to patients reduces manual efforts for hospital administrators.

Twenty-four hour account access with paper bill opt-out cuts billing costs by reducing the need for printing and mailing bills. Automated payment options and electronic bill presentment with stored payment history lowers patient calls, while improving patient satisfaction.

Enable enterprise standardization with reliability, security, and easy back-office integration.

Velocity enables organizations to maintain full compliance across the enterprise, essential for organizations accepting both payment and patient data. With Velocity, HIPAA, PCI/CISP, SAS-70, and PABP compliant solutions ensure data integrity and compliance with continuously changing industry requirements.

Velocity solutions are rapidly deployable and integrate effortlessly with existing ERM, A/R and accounting systems. Velocity for Hospitals provides turnkey implementations, training, installation, consulting and technical support combined with 24-hour customer support. Velocity's fully-hosted solution reduces your technical support and infrastructure costs while maintaining the highest level of specialized support available.
